

IAPMO DW&BP Training and Certification

The motto of the Backflow Prevention Institute® is "Safe Water Through Plumbing Code Compliance". Proper training and certification are the keys to achieving that goal. IAPMO's Backflow Prevention Institute is the industry's resource for backflow prevention and cross-connection control. It provides professional training exceeding the industry standards established by the American Society of Sanitary Engineering.

The Institute's certification programs include:

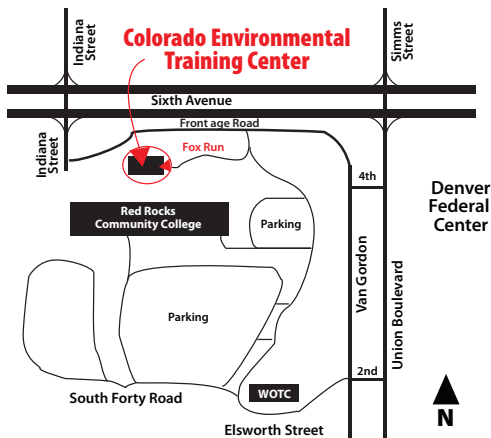

- Backflow Prevention Assembly Tester
- Backflow Prevention Assembly Repairer
- Cross-Connection Control Surveyor

Each of these courses include a certification exam through the American Society of Sanitary Engineering. The ASSE publishes ANSI recognized Professional Qualification Standards (ASSE Series 5000), and ASSE offers a certification to those standards that is recognized by the model plumbing codes in the United States, including the *Uniform Plumbing Code*®.

Special Accommodations

IAPMO is committed to providing reasonable accommodations to test candidates and seminar participants who have documented disabilities recognized under the Americans with Disabilities Act (ADA). All requests for accommodations will be evaluated in accordance with IAPMO's documented administrative procedure and criteria. The application form and guidelines can be obtained at http://www.iapmo.org/Pages/AttendanOpen_EnrollmentCourse.aspx or by calling 708-995-3005

Directions to Red Rocks Community College Lakewood – Colorado Campus

The classroom, laboratory and certification exam will all be held at the Red Rocks Environmental Training Center. The "ETC" is located north of the main campus building on Fox Run. The class begins at 8:00am and will end at 5:00pm.
